

## **Canoe/Kayak Launch Construction Budget Considerations**

This document is intended to provide you with some basic line items to consider as you create a budget for your launch sites. Goals for each trail and existing conditions at each launch will vary. Trail organizers and partners may have resources at their disposal such as donated equipment, access to land and or free labor which significantly impact the cost of the project. The degree of design work and the amount of construction needed will depend on the site, as well as on whether any of those services can be donated. Because every situation is so different, it is difficult to say how much your launch will cost.

### **Launch Site Location**

Land acquisition

### **Construction**

Launch Site Construction

Equipment Rental

Permits

Consultants

Labor

Parking Area

### **Maintenance Costs**

### **Signage**

### **Facilities - Optional**

Restroom

Picnic Facilities

Camping Facilities

Trash / Recycling
